

SPECSGROUP

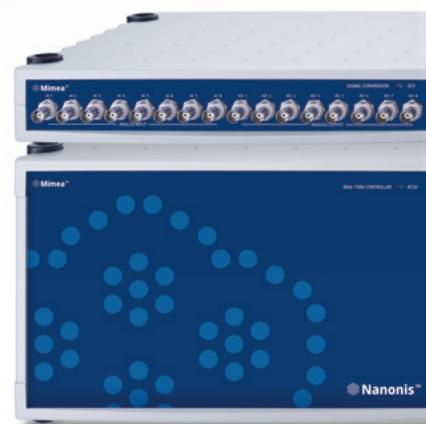

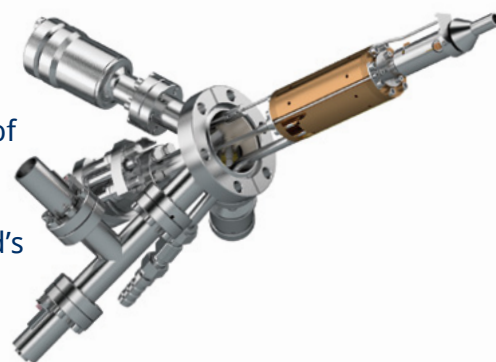

SPECS Surface Nano Analysis GmbH A Story of Constant Innovation

SPECSGROUP is the leading manufacturer of components and systems for surface analysis and metrology. With more than 190 employees in Berlin and Hünstetten and 220 employees worldwide, we develop and manufacture scientific instruments for university research and industrial research and development.

The **SPECSGROUP** includes the brands **SPECS**, the specialist for integrated surface analysis systems for research in the fields of energy and catalysis research, interfacial physics and chemistry, and the electronic structure of semiconductors, **FOCUS**, the leading brand for momentum microscopy and electron beam welding machines, **Nanonis**, the world's leading brand for control electronics and software for scanning probe microscopes, and **Enviro**, fully automated metrology measurement solutions for industry.

SPECSGROUP is part of the Lab14 Group and thus part of RSBG SE for the social management of the perpetual obligations arising from coal mining.
